Ethers.js

Hardhat

## PERSONAL PROJECTS

### Accommodation Platform for COMSATS Students

- I made a special website just for COMSATS University students. It helps them easily find places to stay around the university.
- The website connects students looking for rooms with people who have rooms to rent. The goal was to make it easier for students to find good places.

### Blockchain-based Supply Chain Tracking on Ethereum

- I Created a supply chain tracking solution on Ethereum blockchain to provide users with visibility into the journey of their product.
- The platform utilized smart contracts and decentralized technology to ensure transparency, security, and immutability of supply chain data.

### Comsats cryptocurrency coin (04/2023 - Present)

- To create a digital currency that can be used within the COMSATS Institute campus for various transactions
- create a more secure and transparent transaction system that eliminates the need for third-party involvement

### Taxi Booking Application

- Developed a user-friendly taxi booking application that allows users to conveniently book rides with a few taps on their smartphones.
- The application aimed to provide a seamless experience for both passengers and drivers by utilizing real-time location tracking and secure payment
